

FOR IMMEDIATE RELEASE

BMR 2008+ Pontiac G8 Strut Tower Brace

Eliminate tower deflection under load in your new Pontiac G8 with one of BMR Fabrication's G8 strut tower braces. These braces are constructed from 1 1/4" x .120 wall DOM steel and 3/16" CNC broke plates. There is no need to remove the struts during installation of the BMR strut tower brace, and it also does not require any permanent modifications - as the brace uses existing holes to mount in the engine bay, for a truly bolt-in piece. These braces are bent to conform to the engine covers in the G8 engine bays for added visual appeal. Available now, in black hammertone or red powdercoat.

To preview all of BMR's high-performance suspension parts, please visit www.bmrfabrication.com, e-mail sales@bmrfabrication.com, or contact them at BMR Fabrication, 12581 US Highway 301 North, Thonotosassa, FL 33592, 813-986-9302, Fax: 813-986-8055.
